PROFILE

Innovative Software Engineer with proven experience in building modern, scalable web applications and AI-powered solutions. Skilled in React, Tailwind CSS, JavaScript, TypeScript, Node.js, and Firebase, with hands-on expertise in designing and deploying cloud-integrated systems through Firebase Studio projects such as ResumeRocket, AquaFolio, Vision Parser, EduGenius, and FurnishFlow CRM. Successfully delivered a Final Year Project Nutrimate Chatbot, an AI-driven nutrition and health recommendation system using Google Gemini. Completed a professional internship at Suncrown Agri Business, contributing to system efficiency and automation. In addition, gained valuable data entry and process optimization experience, ensuring accuracy and speed in handling large datasets. Adept at combining strong technical skills, creative problem solving, and user centered design to deliver impactful digital solutions.

EXPERIENCE

DATA ENTRY

Pioneer Home Solutions

2024-01 - january 2025

- Developed and deployed five Firebase Studio projects (ResumeRocket, AquaFolio, Vision Parser, EduGenius, FurnishFlow CRM), showcasing strong expertise in React, JavaScript, TypeScript, Firebase, and Node.js.
- Gained hands-on data entry and process optimization experience, ensuring accuracy, speed, and reliability in handling large datasets.
- Built a modern personal portfolio website with Framer Motion animations, TailwindCSS design, and React, demonstrating UI/UX creativity.

PROJECTS

EduGenius – Interactive Learning App

EduGenius is an AI-powered educational web app designed for children to make learning engaging and fun. The app provides interactive lessons and activities across multiple categories including
