ABOUT ME

Proficient in Firebase web application development (Authentication, Firestore, Realtime Database, Hosting, Cloud Functions) and experienced in building AppSheet mobile applications for business automation with Google Sheets as backend. Skilled in data entry, validation, and reporting within Google Sheets and Firebase apps, ensuring accuracy and consistency across large datasets. Strong programming foundation in JavaScript, Node.js, React,with additional expertise in software documentation, debugging, and system design. Hands-on experience with tools including Git/GitHub, Firebase Studio, AppSheet Editor, and Google Workspace, combined with strong problem-solving and remote collaboration skills.

EXPERIENCE

2024 – 2025

App Manager & Data Entry (Remote) USA

Managed daily workloads by organising schedules and delegating tasks. Performed accurate data entry, updates, and validation to keep records current and reliable.
